Topic : Constants

# Declaring (Creating) Constants

```
package main
```

```
import "fmt"
```

```
const PRODUCT string = "Canada"
```

```
const PRICE = 500
```

```
func main() {  
    fmt.Println(PRODUCT)  
    fmt.Println(PRICE)  
}
```

# Multiple Constants Declaration Block

```
package main
```

```
import "fmt"
```

```
const (  
    PRODUCT = "Mobile"  
    QUANTITY = 50  
    PRICE    = 50.50  
    STOCK    = true  
)
```

```
func main() {  
    fmt.Println(QUANTITY)  
    fmt.Println(PRICE)  
    fmt.Println(PRODUCT)  
    fmt.Println(STOCK)  
}
```
